TWO METRE TALL REAL ALES:

Forester Pale Ale 5.5% alc vol. 500ml & 330ml bottles

A refreshing and versatile, fully flavoured, bitter pale ale. Pride of Ringwood hops sourced directly from the farm of one of the last two hop growers in Tasmania's North Eastern Forester River region.

Huon Dark Ale 5.5% alc vol. 500ml & 330ml bottles

A classic dark ale base with a soft, rich malt body and added "palate interest" achieved via the use of fresh, unfiltered apple juice procured directly from one of the last remaining apple growers in Tasmania's Huon Valley to be juicing their own apples "on farm". This is a complex, different and ultimately satisfying drinking experience.

Derwent Clear Ale 5.5% alc vol. 500ml & 330ml bottles

Wheat & barley malts are used in this ale along with old, noble aromatic hop varieties grown on the banks of the Derwent River, Australia's major hop growing district for over 175 years. All of the hops varieties used are no longer commercially available.

Two Metre Tall Cleansing Ale 4.9% alc vol 330ml bottles only

Refreshing, bottle-conditioned real ale, perfect to quench the thirst! This ale has been brewed to introduce consumers to the fascinating world of real ale and uses Tasmanian grown ingredients.

HUON DRY FARMHOUSE CIDER **SOLD OUT – New 2010 Vintage released late August** **7.5% alc vol. 500ml bottles only**

When we discovered the Griggs family at Lucaston Orchard in the Huon Valley were still growing the famous old English cider variety, Sturmer Pippen, that was all the motivation we needed to produce a traditional unfiltered, bottle fermented farmhouse cider made using only apples and yeast.

VARIATION IS NATURAL

Each bottle of 2MT Real Ale is unique

Our ales are handmade, unfiltered, and feature the key aromatic ingredient (hops & fruit) sourced directly from the region named on the label. Each ingredient will show seasonal variation and so each brew will be different. Therefore all our beers have the brew date recorded on them.

Our ales are bottle fermented. This process leaves yeast sediment, a natural & completely harmless residue which keeps the beer 'alive' and thus defines our beers as Real Ales. Because each bottle undergoes this process, small variation from bottle to bottle can be expected and for this reason each bottle is also individually numbered.

The definition below is taken from the UK based "**Campaign for Real Ale**" website: www.camra.co.uk

"Real ale is a type of beer defined by its traditional production. Also known as 'cask conditioned' beer; the fundamental distinction between real and other ales is that the yeast is still present in the container from which the beer is served, although it will have settled to the bottom and is not poured into the glass. Because the yeast is still alive, the process of fermentation continues in the cask or bottle on the way to the consumer ensuring a fresh and natural taste."

Please note that due to the intensive nature of hand made production as well as the high demand for our ale, your preferred selection may not always be available.
